    - Summer School / Camp Monticello – 2<sup>nd</sup> – 6<sup>th</sup> Grade: x 153
- **GUIDANCE PLAN:** During summer camp, there are clear set boundaries. Part of disciplining children is guidance. When students have a conflict, we do not immediately intervene unless they are hurting each other. We will observe first and allow the students to resolve their problems. However, if the students are unable to resolve, then there are several techniques that we often use. They are as follow:

## 2022 CAMP MONTICELLO

- **Redirection:** Directing them to a more positive behavior or action, such as if you want to hit something, why not hit a ball. Students are always encouraged to show they are sorry rather than saying sorry to each other. Actions speak more than words.
- **Reasoning:** Having a conversation and explaining to students through the use of logic and discussion about different scenarios. Role-playing generally helps students understand others' perspectives.
- **Loss of privileges:** Students' privileges are removed when they have been warned at least once or twice. Privileges are removed for the day or until further notice depending on the severity of the action.
- **Taking a break from the stimulation:** Sometimes giving students time to themselves can help them regroup and think about what had just happened. We allow them to sit in a quiet area to ponder about their action and how they can react differently. When they are ready, they will come to us for discussion. Having a discussion is very important as a follow-up to their break.
- **Choice:** Students are given only two choices at a time. The choices are conducive to what we are trying to encourage at that moment and are positive.
- **Positive Reinforcement:** Catching them while they are at their best through praises and words of encouragement can go a long way.
- **Warning:** Everyone is given at least one warning before actions are taken. We need to maintain consistency and follow through before anything can be effective with the students.

These techniques will help the students learn to cope with conflicts more effectively through the usage of words rather than physical. In talking with the students, the words are very simple and straight to the point.
